ABOUT ME

I am a Junior Full Stack Developer with a Bachelor's degree in Business Informatics, I bring a unique blend of business acumen and technical expertise to the realm of software development. With a solid foundation in both business processes and information technology, I am passionate about leveraging this interdisciplinary background to create innovative and efficient solutions. Proficient in frontend and backend technologies, I am dedicated to delivering high-quality, user-centric applications while continually expanding my skill set to contribute effectively to collaborative team environments

WORK EXPERIENCE

LTH METAL CAST D.O.O.

CNC operator, October 2018- July 2019

- Prepare CNC machines for operation by setting up tools, loading materials, inputting program data, and verifying machine settings according to specifications
- Operate CNC machines to execute programmed machining operations such as drilling, milling, turning, and cutting to produce high-quality parts within tolerance

IMMENSE AGENCY

Full-Stack Developer Intern, February 2023- June 2023

- Assisted in developing responsive and user-friendly web interfaces using HTML, CSS, and JavaScript frameworks such as React, Next.js
- Worked with server-side technologies like Node.js to develop APIs, databases, and server logic
- Assisted in designing and implementing databases, writing queries, and optimizing database performance using SQL or NoSQL databases like MongoDB, or MySQL
- Analyzed and solved technical problems independently or collaboratively, using critical thinking and problem-solving skills
